

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

| | |
|---------------|--|
| Date | 18 June 2025 |
| Team ID | LTVIP2025TMID32067 |
| Project Name | Sustainable smart City assistant using IBM granite LLM |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|--------|---------------------------------------|--|
| FR-1 | User Registration | Registration through Form Registration through Gmail Registration through LinkedIN |
| FR-2 | User Confirmation | Confirmation via Email Confirmation via OTP |
| FR-3 | Environmental Info Assistant | <ul style="list-style-type: none">- Query air quality- Query waste collection schedule- Get sustainability tips |
| FR-4 | Civic Reporting | <ul style="list-style-type: none">- Report issues (waste, water, power outage)- Track complaint status- Upload images for issue reports |
| FR-5 | Personalized Sustainability Insights | <ul style="list-style-type: none">- Suggest eco-friendly actions based on user profile- Track user's environmental impact (e.g., energy savings, recycling)- Daily tips based on user behavior |
| FR-6 | Multilingual and Accessible Interface | <ul style="list-style-type: none">- Support for regional languages (Gujarati, Hindi, English)- Voice-based interaction for elderly users- Text-to-speech for visually impaired users |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|---|
| NFR-1 | Usability | The assistant must have a clean, intuitive UI accessible by all users including elderly and low-literacy users. |
| NFR-2 | Security | User data (login, queries, complaint details) must be securely encrypted and |

| | | |
|-------|---------------------|---|
| | | authenticated using OAuth2 protocols. |
| NFR-3 | Reliability | The system must work consistently without failures and ensure fallback if AI services are temporarily down. |
| NFR-4 | Performance | The assistant should respond to user queries within 2 seconds for a smooth experience. |
| NFR-5 | Availability | The application should be available 99.9% of the time with minimal downtime. |
| NFR-6 | Scalability | The solution should support scale-up to multiple cities and thousands of users simultaneously. |
